Network Rail standards and controls are a set of documents we produce to define the way we work. They set out the information we share, the principles we have and the business requirements we work to. Together, they give us a consistent, safe and coherent set of working practices across the whole company.

Reviewing our standards - Network Rail

Stipulate consistency and safety for rail infrastructure design and construction. This compilation of UK Network Rail Standards addresses multiple operational and design subjects to secure the safe and efficient operation of rail infrastructure. With the exception of Guidance Notes, these standards are mandatory and contain specific information dictating design, construction, safety and security.

You can use the Standards Catalogue to access all relevant standards managed by RSSB and other partner organisations. Standards Annual Report 2019 The Standards Annual Report 2019 provides a retrospective view of RSSB's work in supporting and producing standards, and in facilitating standardisation activities in the UK, Europe and worldwide.

Finding and Staying Up-to-Date with Standards

Rail Industry Standards (RISs) define functional or technical requirements to be met in circumstances where the management of the railway system does not need the use of Railway Group Standards (RGSs). RISs are railway-specific standards: they contain requirements applicable to subsystems, or they set out rules about how subsystems should be operated or
