Cfm56 Engine

The CFM56 is a two-shaft (or two-spool) engine, meaning that there are two rotating shafts, one high-pressure and one low-pressure. Each is powered by its own turbine section (the high-pressure and low-pressure turbines, respectively).

CFM International CFM56 - Wikipedia

The CFM56 engine set the standard for single-aisle commercial jet engines. Owing its success to its exceptional reliability and performance, CFM56 was built on over four decades of experience and technological excellence. With more than 30,000 engines delivered to date, it powers more than 550 operators worldwide.

CFM56 - CFM International Jet Engines CFM International

CFM International is the world's leading supplier of jet engines for commercial airplanes. CFM engines include LEAP and CFM56.
