Methods in Java - GeeksforGeeks

Java - What is OOP? OOP stands for Object-Oriented Programming.. Procedural programming is about writing procedures or methods that perform operations on the data, while object-oriented programming is about creating objects that contain both data and methods.

Java OOP (Object-Oriented Programming)

using Java's class mechanism. We teach students how to use, create, and design data types. Modularity, encapsulation, and other modern programming paradigms are the central concepts of this stage. Algorithms and data structures combine these modern programming paradigms with classic methods of organizing and processing data that remain effec-
