The Nissan H series of automobile engines is an evolution of the Nissan "R" engine which was based on the 1.5L 3 main "G" used in the 1960s. Both straight-4 and straight-6 versions were produced, it is a pushrod OHV design with iron block, early models with an iron head, later models with aluminum head. Versions of this motor have been used in many Nissan autos and forklifts, well into the ...

The SCA Engine Leveller is the perfect companion for an engine crane. The all-steel build and red powder-coating matches the engine crane. It provides four mounting points to your engine and will balance up to 540kg of motor. Connect the top of this device to your engine crane hook and now you have more control as you perform the lift. Just give the plastic handle a spin to level the engine ...
